

## HONORS CLUB NEWS

On April 17, 2010, The Honors Club and Phi Theta Kappa participated in Relay for Life at the Annandale campus. Relay for Life is an event organized by the American Cancer Society which raises money for cancer awareness, research, and treatment. Twenty-eight teams from NOVA participated in the event and were able to raise over \$25,000. The Honors Club/PTK team successfully participated in the twelve hour walk and with your support and donations raised \$805.00!

Did you know that a language dies every fourteen days? On April 22, 2010, the NOVA Honors Program hosted a screening of the documentary film *The Linguists*. It was a special honor to have David Harrison, Ph.D., co-star of the film, in attendance. Dr. Harrison conducted a special Q&A after the film, bringing attention to the field of linguistics and the extraordinary work he has done in researching and documenting endangered languages. For more information on the film, Dr. Harrison, and his work, please take a look at the following links:
